

Instructions to authors

Archives of Pharmacy publishes original scientific and professional articles from the following fields in pharmacy: medicinal chemistry, pharmaceutical analysis, pharmacognosy, pharmaceutical technology, industrial pharmacy, cosmetology, biopharmacy – bioanalytical and biopharmaceutical research, pharmacokinetics, drug metabolism, pharmacotherapy, biochemistry, medicinal biochemistry, immunology, pathophysiology, microbiology, experimental and clinical pharmacology, toxicology, bromatology, pharmaceutical practice, organization of pharmaceutical practice, pharmacoconomics, pharmaceutical legislation, quality assurance in pharmacy, history of pharmacy, ethics, pharmacoepidemiology and clinical pharmacy.

The manuscripts are classified into the following categories:

- a) **review articles** which can represent an overview of a specific problem or an overall overview of a certain, current topic in pharmacy
- b) **original scientific articles** contain results of original, unpublished research
- c) **professional articles** can have a bibliographic or experimental character
- d) **short communications** contain results of original, unpublished research
- e) **case report** contains detailed report and discussion related to diagnosis and treatment of one or a group of patients.

Categories **Letter to the editor** and **Report** publish novelties from scientific and professional meetings as well as information about them, **information from international pharmaceutical journals, professional news, reviews of new books, biographical and professional notes** (anniversaries, awards, obituaries), as well as **announcements** of the Pharmaceutical Association of Serbia and its professional sections.

Articles are published primarily in English, and exceptionally in Serbian.

The manuscript and accompanying files should be submitted on-line using editorial system ASISTENT (<http://aseestant.ceon.rs/index.php/arhfarm>). In order to successfully submit manuscript, please register in the system ASISTENT and enter all required information. If you are already registered as an author, reviewer, editor of other journal, please do not register again. You can log in with by entering your user name and password. If you wish to change

your email address, password or any other detail, please go to »Forgot your password?« button or to your profile to change necessary data. For any additional question authors can contact Manager of the journal, Prof. Dr. Nevena Ivanović (e-mail: nevena.ivanovic@pharmacy.bg.ac.rs) or Editors-in-Chief, Prof. Dr. Ljiljana Đekić (e-mail: ljiljana.djekic@pharmacy.bg.ac.rs) and Prof. Dr. Aleksandra Buha Đorđević (e-mail: aleksandra.buha@pharmacy.bg.ac.rs). You can also access to the [Instructions for the submission process through SCIndex Assistant Platform](#), to smoothly submit the manuscript.

Open access, Licensing and Copyright. Journal Archives of Pharmacy is published under an Open Access licence. All its content is available free of charge. Users can read, download, copy, distribute, print, search the full text of articles, as well as to establish HTML links to them, without having to seek the consent of the author or publisher. The right to use content without consent does not release the users from the obligation to give the credit to the journal and its content under the Creative Commons Attribution ShareAlike 4.0 International license ([CC BY-SA](#)). It is allowed to copy and redistribute the material in any medium or format, and remix, transform, and build upon it for any purpose, even commercially, as long as appropriate credit is given to the original author(s), a link to the license is provided, it is indicated if changes were made and the new work is distributed under the same license as the original. Users are required to provide full bibliographic description of the original publication (authors, article title, journal title, volume, issue, pages), as well as its DOI code. In electronic publishing, users are also required to link the content with both the original article published in Archives of Pharmacy and the licence used. Authors are able to enter into separate, additional contractual arrangements for the non-exclusive distribution of the journal's published version of the work (e.g., post it to an institutional repository or publish it in a book), with an acknowledgement of its initial publication in this journal.

Authors are permitted to deposit publisher's version (PDF) of their work in an institutional repository, subject-based repository, author's personal website (including social networking sites, such as ResearchGate, Academia.edu, etc.), at any time after publication. Full bibliographic information (authors, article title, journal title, volume, issue, pages) about the original publication must be provided and links must be made to the article's DOI and the license.

The views expressed in the published works do not express the views of the Editors and the Editorial Staff. The authors take legal and moral responsibility for the ideas expressed in the articles. Publisher shall have no liability in the event of issuance of any claims for damages. The Publisher will not be held legally responsible should there be any claims for compensation.

In accordance with law, digital copies of all published volumes are archived in the legal deposit library of the National Library of Serbia and concurrently in the Repository of SCIndeks - The Serbian Citation Index as the primary full text database.

Journal Archives of Pharmacy does not charge authors or any third party for publication. Both manuscript submission and processing services, and article publishing services are free of charge. There are no hidden costs whatsoever. No fee is paid to the authors for published articles. Authors retain copyright of the published papers and grant to the publisher the non-exclusive right to publish the article, to be cited as its original publisher in case of reuse, and to distribute it in all forms and media.

Cover letter. Alongside the manuscript, a cover letter must be submitted. The letter must be signed by all authors, or by the corresponding author (with previous consent from all authors). The letter should include a statement that the work described in the article has not been published previously, that the article is not under consideration for publication elsewhere and that the manuscript has been read and approved by all the authors who fulfill the criteria for authorship. Also, a proposal of at least two potential reviewers should be included in the cover letter. It is generally appreciated that the reviewers cannot be from the same institutions as the authors of the submitted manuscript as well as the coauthors of the recently published manuscripts. Additionally, copies of permissions for the reproduction of previously published materials and illustrations should be submitted.

Manuscripts are sent for review only if they pass the initial evaluation regarding their form and thematic scope. A special care is taken that the initial evaluation does not last more than necessary.

The articles are reviewed by two independent reviewers. The names of the reviewers are confidential. Under normal circumstances, the review process takes 15 (fifteen) days. Upon reception of the review, the corresponding author is obliged to correct the paper according to the reviewers' suggestions until the deadline indicated by the Editorial decision. During the review process the Editor-in-Chief may require authors to provide additional information (including raw data) if they are necessary for the evaluation of the manuscript. These materials shall be kept confidential and must not be used for any other purposes.

In the case that the authors have serious and reasonable objections to the reviews, the Editorial Board makes an assessment of whether a review is objective and whether it meets academic standards. If there is a doubt about the objectivity or quality of review, the Editor-in-Chief will assign additional reviewer(s). Additional reviewers may also be assigned when reviewers'

decisions (accept or reject) are contrary to each other or otherwise substantially incompatible. The final decision on the acceptance of the manuscript for publication rests solely with the Editorial board.

The proof is sent to the authors who need to review it within 2 (two) working days.

The average time from submission to publication is 2 months.

The responsibilities of authors, editors and reviewers, and the ethics of publishing works are explained in the SCIndex - Serbian Citation Index database (<https://scindeks.ceon.rs/PublicationPolicy.aspx?issn=0004-1963&lang=en>).

PREPARATION OF THE MANUSCRIPT

Manuscripts should be typed on an A4 paper format, double-spaced, with 3 cm margins. Font Times New Roman, font size 12 pt. Review articles should not exceed 30 pages, whereas original scientific and professional articles should not exceed 20 pages. Short communications should be written on up to 10 pages. The content of individual sections (described in the following text) refers primarily to scientific articles; review and professional articles should have appropriate subtitles.

The manuscript has to be arranged as follows:

I – Front page

1. *The title* should be short, clear, informative and without abbreviations and formulae, with full names of the authors, names of the authors' institutions and the exact address of the corresponding author.

2. *Author names* – present full names and surnames of the authors, with the authors' affiliation marked with an Arabic number in superscript and the corresponding author marked with an asterisk.

3. *Institution names* are presented as full (official) names, with postal addresses, underneath the names of the authors. The stated institutions should refer to the place where the actual work was done (for scientific papers, short communications and experimental professional papers); for other types of publications, state the authors' place of work at the time of manuscript preparation.

4. The *corresponding author* should be clearly specified. The corresponding author's affiliation should be stated, as well as their e-mail address and telephone number.

Front page should be written in English and in Serbian, as well.

II - Abstract

5. *Abstract, non-structured*, up to 200 words, should be prepared on a separate page and include all important facts presented in the article, including the main conclusion. Papers written in English should have an abstract in English, as well as an abstract in Serbian presented on the following page. Papers written in Serbian should have an abstract in Serbian, as well as an abstract in English presented on the following page.

6. *Key words* should be selected in a way that clearly indicates the research problem and the results; up to 5 (five) key words should be written both in Serbian in English, underneath the appropriate abstract.

III – Manuscript

7. The *introduction* should be written in a clear and concise manner, and include the essence of the research problem and related references, as well as the aim of the study.

8. The *Experimental part* should include the description of subjects, materials and methods used in the experiment. If methods are widely known and described in the literature, only reference(s) containing a more detailed description should be cited. New or modified methods should be fully described. Methods used for calculation of parameters and statistical analyses should be stated as well. All abbreviations must be explained the first time they are used in the manuscript. For drugs, generic names should be used, and proprietary names only if necessary. International units of measurement (SI units) should be used, unless other types of units are indicated.

9. The *Results* should be clear and precise, and contain the statistical methods used for analysis.

10. The *Discussion* includes the interpretation of the results and their comparison to literature data. At the end of this part, all conclusions obtained during the research need to be specified. The last two parts of the manuscript can be presented together as a single *Results and Discussion* section.

11. *Acknowledgements* contain information about or words of authors' appreciation for scientific, professional, technical or financial help. *Acknowledgements* are presented after the *Discussion* section, or after the *Results and Discussion* section. If the paper is part of a project, the project number should be listed using square brackets [project number XXXX].

12. *References* – more details in the following text.

IV – Equations/Formulae

The meaning of symbols should be explained on first use, just under the equation/formula. Equations/formulae should be numbered in order of appearance, on the right side, using round brackets. Ion valence should be listed as e.g. Ca^{2+} , not as Ca^{++} . Isotope number should be written before the chemical element symbol, e.g. ^{18}O . One should avoid repeating the chemical formula too many times. Full chemical names of substances should be written. In cases of very long chemical names, they can be abbreviated, by inserting the chemical element symbol.

V – Obligatory sections

According to good publishing practice, additional information must be incorporated in the manuscript.

Acknowledgements – please provide information on the financial support of your work. Did you receive any kind of a grant? If so, please provide the name and grant number.

Declaration of Competing Interest – the corresponding author, on behalf of all the authors of a submission, must disclose any financial and personal relationships with other persons or organizations that could inappropriately influence (bias) their work. Examples of potential conflicts of interest include employment, consultancies, stock ownership, honoraria, paid expert testimony, patent applications/registrations, and grants or other funding. All authors, including those *without* competing interests to declare, should provide the relevant information to the corresponding author (which, where relevant, may specify they have nothing to declare). If you have no competing interest, please indicate: “The authors declare that they have no known competing financial interests or personal relationships that could have appeared to influence the work reported in this paper”.

Author contributions – for the sake of transparency, we require corresponding authors to provide co-author contributions to the manuscript using the relevant CRediT roles. The CRediT taxonomy includes 14 different roles describing each contributor’s specific contribution to the scholarly output. The roles are: Conceptualization; Data curation; Formal analysis; Funding acquisition; Investigation; Methodology; Project administration; Resources; Software; Supervision; Validation; Visualization; Roles/Writing – original draft;

and Writing - review & editing. Please note that not all roles may apply to every manuscript, and that authors may have contributed through multiple roles.

VI - References

References in text are marked using Arabic numerals, inside round brackets (). The list of references should be presented at the end of the manuscript, in the order in which references appear in the text. Journal names should be abbreviated according to *Index Medicus*. The Vancouver numbered referencing style should be used, according to the rules established by the *International Committee of Medical Journal Editors* <http://www.icmje.org/>; also known as – Uniform Requirements for Manuscripts Submitted to Biomedical Journals. If there are more than six authors, list the first six and add *et al.*

<http://www.ncbi.nlm.nih.gov/books/NBK7256/>

Examples

a) Articles in journals:

Petitti DB, Crooks VC, Buckwalter JG, Chiu V. Blood pressure levels before dementia. *Arch Neurol.* 2005;62(1):112-6.

In cases where the reference has no volume number and/or page numbers, the *doi* number must be listed:

Asín-Prieto E, Rodríguez-Gascón A, Isla A. Applications of the pharmacokinetic/pharmacodynamic (PK/PD) analysis of antimicrobial agents. *J Infect Chemother.* doi: 10.1016/j.jiac.2015.02.001.

Special types of published journals

- Special edition of the journal

Pekcan O, Kara S. Cation effect on thermal transition of iota-carrageenan: a photon transmission study. *J Biomater Sci (Polym Ed).* 2005;16(3):317-33.

- Special number of the journal

Scott JD. The protease inhibitor drugs. *Posit Aware.* 2005 Winter;Spec No:16-9. Mar Molinero F, Ramos Amador JT, Sanchez Diaz JI. *Terapeutica*

antimicrobiana en las infecciones respiratorias de vías bajas [Antibacterial therapy in lower respiratory tract infections]. *An Esp Pediatr.* 1997;Spec No 2:207-8. (in Spanish).

- *Journal supplement*

Beyond menopause. Life after estrogen. *Mayo Clin Health Lett.* 2005;50(3S):1-8.

b) Books and monographs:

One or multiple authors

Jenkins PF. Making sense of the chest x-ray: a hands-on guide. New York: Oxford University Press; 2005. 194 p.

World Health Organisation. Quality assurance of pharmaceuticals. A compendium of guidelines and related materials. Volume 2 - Good manufacturing practices and inspection. Geneva, 1999.

International Organisation for Standardisation/International Electrotechnical Commission (ISO/ IEC). Guide 73. Risk management – Vocabulary – Guidelines for use in standards. 1st ed. 2002.

European Pharmacopoeia. 9th ed, Strasbourg: Council of Europe, 2016.

Reference to a website

Complementary/Integrative Medicine [Internet]. Houston: University of Texas, M. D. Anderson Cancer Center; c2007 [cited 2007 Feb 21]. Available from: <http://www.mdanderson.org/departments/CIMER/>.

Reference to a website with authors

Hooper JF. Psychiatry & the Law: Forensic Psychiatric Resource Page [Internet]. Tuscaloosa (AL): University of Alabama, Department of Psychiatry and Neurology; 1999 Jan 1 [updated 2006 Jul 8; cited 2007 Feb 23]. Available from: <http://bama.ua.edu/~jhooper/>.

VII – Figures and tables

Figures and *Tables* should be provided on a separate page, after the reference list and labeled in the same way as in the text.

All figure/table captions/legends need to be prepared in Serbian and in English, and placed before/after the *Tables* and *Figures*.

Tables should be numbered with Roman numerals and with the captions above the tables. Tables should be created and attached as *Word documents*, not as figures/images. Rows and columns should not be colored or shadowed.

Figures are numbered with Arabic numerals, with the legend under the figure (legends are typed on a separate page). Every figure (photograph, drawing, sketch) should have a title/caption. The title/caption needs to be short, and placed under the figure, never on the figure itself. The amount of text on figures should be kept at a minimum and used only to explain used symbols or abbreviations. Figures (in color or black-white) should be saved in TIFF (or JPG) format, with a resolution of at least 300 dpi.

Editorial Board
